PROFILE

Experienced Frontend developer with a strong interest in backend development. I specialize in creating high-quality user interfaces using modern technologies and frameworks (React/Vue). I am actively learning Node.js (Nest.js) to expand my skills and create more complex applications. In my free time, I am passionate about mountain hiking and extreme sports, which helps me stay focused and pay attention to details in my work.

EDUCATION

Bachelor, Tashkent University of Information Technologies

Tashkent

Sep 2019 - 2024

EMPLOYMENT HISTORY

Frontend Team Lead

Tashkent

12.06.2024 - Present

MUK Computers

Muk International - international project value-added IT-distributor

At Muk International, I serve as a Team Lead for the Frontend team, leading the development of a custom marketplace platform from the ground up. My role encompasses full ownership of the frontend stack, architectural decisions, and integration with backend services. My responsibilities include:

- Bootstrapped a React-based marketplace application tailored to internal business needs, using modern technologies like TypeScript, Zustand, Tanstack Router, Tanstack Query, and Tanstack Table.
- Designed and implemented a reusable, scalable UI Kit, ensuring consistent styling and behavior across the application.
- Integrated complex backend APIs into the frontend layer, handling authentication, data fetching, state synchronization, and error boundaries.
- Set up and enforced project-wide developer tooling, including ESLint, Prettier, and commit hooks, to maintain code quality and team consistency.
- Established architectural patterns and best practices for component structure, routing, and data management to support long-term scalability.
- Closely collaborated with backend developers and product stakeholders to shape the platform's capabilities around real business requirements.

Frontend Developer

Tashkent

04.04.2022 - 01.04.2024

Bulavka.uz

Bulavka.uz - one of the major online marketplaces in Uzbekistan. In this company, I hold the position of a Frontend developer. In this company, I keep the website up and running, implement new features, fix bugs. Also:

- Led the redesign of key pages such as the cart, product, and checkout pages. These pages were initially written in PHP, which complicated the user experience. Successfully migrated these pages to Vue.js / Nuxt.js, enhancing performance and usability.
- Refactored code in the administrative and business sections of the application, optimizing both hardware performance and user experience. This included managing frequent server requests, organizing image uploads, implementing dynamic component loading, and creating various components for streamlined interactions with the tax authorities.
- Oversaw the migration from Angular.js to Vue.js for the administrative part of the application. Recognizing Angular.js as an outdated and complex technology, I proposed and executed a gradual migration to Vue.js, achieving approximately 70 % completion before my departure.
- Managed the migration of the supplier business dashboard from Quasar 1 to Quasar 2 and from Vue 2 to Vue 3, ensuring improved performance and maintainability.
- Optimized the user interface for the business cabinet, enhancing the supplier experience through improved loading times and dynamic content updates.
- Collaborated closely with backend developers and UI / UX designers to ensure seamless integration of new features and consistent user experiences.
- Conducted thorough code reviews and implemented best practices, significantly reducing bugs and improving code maintainability.
- Provided mentorship and guidance to junior developers, fostering a culture of continuous improvement and professional growth within the team.
- Successfully led multiple sprints focused on enhancing the e-commerce platform, contributing to a 20 % increase in user retention and a 15 % boost in sales.

Frontend developer

Tashkent

01.05.2021 - 04.04.2022

Kirano

Kirano - one of the leading web studios in Tashkent. Here I was engaged in layout of sites of different levels of complexity (online stores, corporate sites, landing pages, etc.).

- Implemented website layouts using HTML, CSS, and JavaScript, ensuring high quality and responsive design.
- Optimized websites to improve Google Page Speed scores, increasing performance and enhancing SEO results.
- Added and optimized complex animations on pages using CSS and JavaScript, enhancing the interactivity and appeal of the user interface.
- Developed JavaScript functionalities, including interactive elements and dynamic behaviors, improving user experience.
- Created administrative panels for content management on websites using modern frameworks and libraries, simplifying the administration process and expanding user capabilities.
- Led the migration of legacy codebases (from jQuery) to modern JavaScript frameworks, significantly improving maintainability and scalability.
- Actively participated in code reviews and provided mentorship to junior developers, fostering a collaborative and growth-oriented team environment.
- Played a key role in a major website redesign project that resulted in a 40% increase in user engagement and a 25% boost in conversion rates.

HTML layout designer, Webtuning

Tashkent

01.02.2021 - 28.04.2021

Webtuning

Webtuning is a new web studio at that time. I learned a lot here, we worked with PHP code (layout of the template by design in Figma).

- Handled website layout using HTML, CSS, and JavaScript, ensuring cross-browser compatibility and adaptability.
- Optimized page load times, resulting in a 35% reduction in load times, improving user experience and SEO.
- Worked on fixing bugs and improving existing features to improve stability and performance of web applications.
- Interacted with designers and backend developers to integrate layouts and functionality, ensuring consistency and high quality of the final product.
- Participated in testing and deployment projects, gaining experience in using various development and version control tools.
